FARMSET STOCKFEED FACTORY

(675) 7258 8292

MON - FRI : 8 AM - 4 PM

SAT : 8 AM - 11 AM

We ensure a solid line of
communication between ourselves,
our customers, suppliers, and
everyone in between.

ALWAYS DREAMING BIG?

LET'S WORK ON THAT TOGETHER!

Established in 2016, the Farmset Stockfeed Factory started production using a small flake mill and a small feed mixer. Back then we were producing 1 tonne per day, today we produce 12 tonnes per day, today we produce 12 tonnes of Pig Feed and Egg Layer Mash per day. Production is estimated to double with the arrival and installation of the new mill production equipment.

Panoramic view of the Stockfeed Factory located off Butibum Road, Lae, Papua New Guinea.

The current customer base spans from the islands to the highlands, but what sets us apart from the other competitors is;

We produce all stockfeed based on the customer's requirements and budget

All manufactured feeds are available at all Farmset branch retail outlets. If branches do not stock what you are after, inquire in store for assistance.

Currently the Stockfeed Factory is equipped to produce the listed and many more.

- Pig Weaner
- Village Pig Mix
- Pig Concentrate
- Pig Grower
- Egg Layer Mash
- Broiler Starter
- Broiler Finisher
- Layer Pullet Grower
- Layer Chick Starter
- Budget Cattle

All feeds are made from local and imported ingredients, formulated according to standard animal nutrient requirements to ensure safe consumption, expeditious growth and increased profit. The hard working team primarily of nationals and their dedicated managers maintain efficient, timely and quality production of all feeds.

The factory also has the inclusion of a animal nutritionist within the team. His inclusion has proved to be an invaluable addition to what we can offer to customers. The animal nutritionist is available to all our existing and new stockfeed customers who may require a customized feed nutrient composition. All this consultation is free and available to all.

WORKING TOWARDS A BRIGHTER FUTURE!

The start of 2019 we engaged in the expansion of our operations, with the sourcing and installation of state of the art feed mill production equipment. The closure of 2019 we are scheduled to be nearing completion of all installation of the equipment.

The production will be driven via a computerized system and will exponentially improve the production output levels.

It is proposed that the factory will launch its own Chicken Starter and Finisher feeds, and will be in full operation continually fulfilling its mission in providing quality and competitively priced stockfeed to customers nationwide.
